

Question Answering powered by OpenAI

Without Context

Creating a ML Engine

```
CREATE ML_ENGINE demo_openai_engine  
FROM openai  
USING  
api_key = 'Your OpenAI API Key here';
```

Checking Model Status

```
SELECT status  
FROM models WHERE name =  
'openai_question_answerer';
```

Creating a Model

```
CREATE MODEL openai_question_answerer  
PREDICT answer  
USING  
engine = 'demo_openai_engine',  
prompt_template = 'Answer the following question. text:  
{{question}}.';
```

Querying the Model

```
SELECT answer  
FROM openai_question_answerer  
WHERE question= 'Who is the CEO of MindsDB?';
```

Dropping the Model

```
Drop Model openai_question_answerer;
```
